DR CLINICAL SCREENING REPORT

Diabetic Retinopathy Screening & Decision-Support System

Case Ref: SCR-20261024-5ED1
Date: 2026-10-24 08:35 UTC
Model: EfficientNet-B3 (Trained)

Patient Identifier:	PAT-LIVE-1792830920	**Screening Status:**	APPROVED
Evaluation Modality:	Retinal Fundus Photography	**Referral Urgency:**	Routine (12 months)

1. PRE-INFERENCE IMAGE QUALITY & GRADABILITY

Gradability Status: GRADABLE | **Sharpness (Laplacian Var):** 310.1 | **Luminance (Mean):** 96.5 / 255

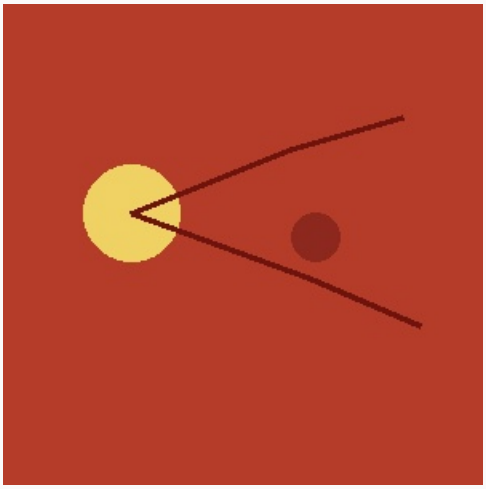
2. AI SCREENING PREDICTION & UNCERTAINTY QUANTIFICATION

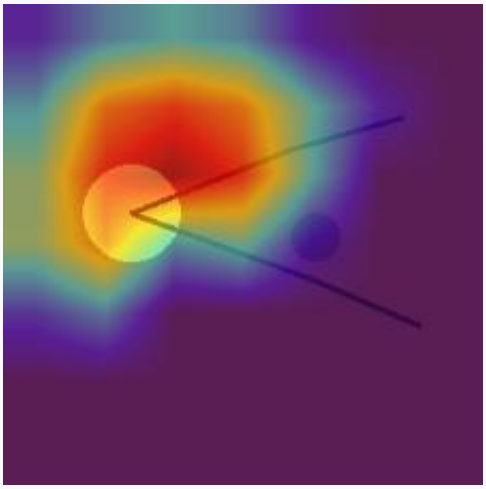
Suggested Severity Grade:
Grade 2: Moderate

Softmax Confidence: 100.0%
MC-Dropout Std: 0.189 (High uncertainty)

Grade Probabilities:
0: 0.0% | 1: 0.0%
2: 100.0% | 3: 0.0%
4: 0.0%

3. EXPLAINABLE AI: RETINAL SALIENCY OVERLAY (GRAD-CAM++)





4. CLINICIAN REVIEW, DIAGNOSTIC CONFIRMATION & AUDIT

Clinician Decision:	**APPROVED**	**Confirmed Grade:**	**2**
Reviewing Clinician:	Dr. Evelyn Reed, MD	**Timestamp:**	2026-10-24 08:35 UTC
Clinical Notes:	Reviewed AI classification and Grad-CAM activation zones. Findings consistent with mild non-proliferative microaneurysms.
