DR CLINICAL SCREENING REPORT

Diabetic Retinopathy Screening & Decision-Support System

Case Ref: SCR-20261024-F074
Date: 2026-10-24 08:08 UTC
Model: EfficientNet-B3 (Trained)

Patient Identifier:	PAT-E2E-66B601	**Screening Status:**	MODIFIED
Evaluation Modality:	Retinal Fundus Photography	**Referral Urgency:**	Urgent

1. PRE-INFERENCE IMAGE QUALITY & GRADABILITY

Gradability Status: GRADABLE | **Sharpness (Laplacian Var):** 256.8 | **Luminance (Mean):** 82.1 / 255

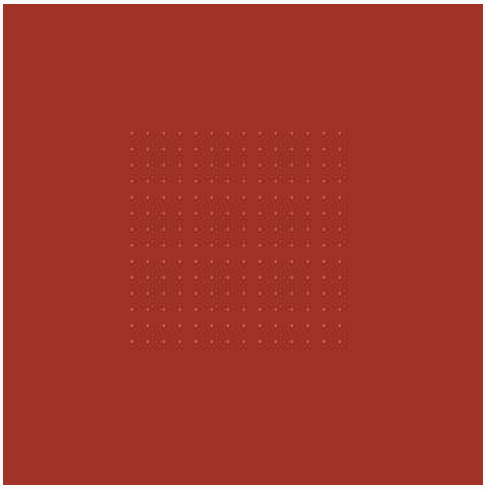
2. AI SCREENING PREDICTION & UNCERTAINTY QUANTIFICATION

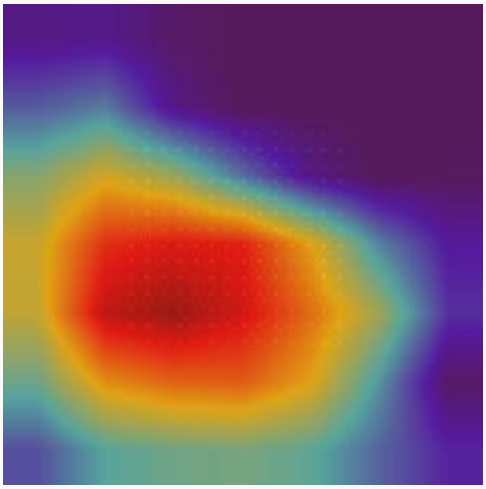
Suggested Severity Grade:
Grade 1: Mild

Softmax Confidence: 100.0%
MC-Dropout Std: 0.283 (High uncertainty)

Grade Probabilities:
0: 0.0% | 1: 100.0%
2: 0.0% | 3: 0.0%
4: 0.0%

3. EXPLAINABLE AI: RETINAL SALIENCY OVERLAY (GRAD-CAM++)





4. CLINICIAN REVIEW, DIAGNOSTIC CONFIRMATION & AUDIT

Clinician Decision:	**MODIFIED**	**Confirmed Grade:**	**2**
Reviewing Clinician:	Dr. Evelyn Reed, MD	**Timestamp:**	2026-10-24 08:08 UTC
Clinical Notes:	Microaneurysms and multiple dot hemorrhages observed in macula. Grade modified by retina specialist.
